LEADTEK

Interactive Surveillance

NSC-3615

Key Features

Support telephony protocol: SIP RFC 3621 standard
External interface for security application: 1 x Sensor-in, 1 x Alarm-out
Color 1/4" CMOS sensor, 1.3 Mega Pixel
MPEG-4/H.263 Video Compression perform D1 resolution
G.711 / G.729 audio codec allows 2 ways audio
JPEG Capture for Motion Detection
Built-in Microphone / external speaker jack
Built-in Web Server for Remote Surveillance on Network
Bundled Remote Surveillance and Management PC Software

Applications (e-surveillance & monitoring, e-learning and conference)

Home users: baby monitoring, home surveillance, neighborhood watch.
Industrial location: Warehouse, laboratory, gas station.
Public works: traffic load, streets, park.
Sightseeing spots: Tourist attractions, Theme Parks.
Enterprise: Convenient / Chain Stores, factory production line, ATM, Bank.
Schools: Playground, Campus surveillance.
Medical: Hospital, Medical care center.

Network Surveillance Camera with 2-way Audio Conversation

All Leadtek surveillance products come with a bundled Windows client (Surveillance Management Center - SMC). Roaming users can access their surveillance cameras no matter where they are as long as they're on the net. With simultaneous multiple client connections in single SMC the management of IP CAM live media is at your fingertips. And a simple click on live video begins 2-way audio communication with the remote surveillance camera. Communication with a Leadtek surveillance camera and SMC could hardly be any easier.

Built-in MIC
CMOS 1.3M pixel
